

Dapp Installation

Jean-Pierre Kocher

Sep-2026

Background

- Dapp is the application that the clinicians use.
- Dapp is installed and run on the desktop of the clinician
- To enable all features, additional apps* need to be installed:
 - Ollama and qwen2.5vl:3b local model
 - Poppler
 - Tesseract

* note that these apps cannot be included in the Dapp distribution for licensing reasons

Download from Github

- Install with **Administrator** privileges

- Dapp from:

<https://github.com/jpkoc/mhealth-platform>

- Ollama (open source) from:

<https://github.com/ollama/ollama>

or use the powershell command:

```
irm https://ollama.com/install.ps1 | iex
```

Local Model qwen2.5vl:3b

Warning!! qwen2.5vl:3b is **3.2GB**

Download from the web

<https://www.ollama.com/library/qwen2.5vl:3b>

store qwen2.5vl:3b in %USERPROFILE%\ollama\models

Plugins for Windows:

Install from PowerShell with **Administrator** privileges
