

Dapp Installation

Jean-Pierre Kocher

Sep-2026

Background

- Dapp is the application that the clinicians use.
- Dapp is installed and run on the desktop of the clinician
- To enable all features, additional apps^{*} need to be installed:
 - Ollama and qwen2.5vl:3b local model
 - Poppler
 - Tesseract

^{*} note that these apps cannot be included in the Dapp distribution for licensing reasons

Dapp Install

- Install with **Administrator** privileges
- Open: <https://github.com/jpkoc/dapp-beta>
- Go to 'release'

Dapp Install (con't)

- Select the latest release (v 1.6 in this example))

Download or run the .exe application

Note: since the app is from an unregistered developer you will have to force the installation

Dapp Install (con't)

right Click
on xxx.exe

first warning

Click on the warning that becomes grey

second
warning

click to scrool down and
select: **keep anyway**

Dapp installation begin
(see next slide)

Installation Process
